## 📁 PROJECTS

### Personality Prediction through CV Analysis

October 2022 – May 2023

- Personality Prediction through CV analysis is a process that aims to predict personality quality based on personal CV analysis.
- It involves extracting relevant information from resumes, such as educational background, employment, skills, achievements, and personal preferences, and using that information to make predictions about their personality traits.

Technologies Used:

- Python | Machine Learning
- Logistic Regression | NLP
- Feature Extraction

### IPO Database Management

- It is a database-dependent application that basically provides users access to IPO which is the official index of the Bombay Stock Exchange (BSE), Small and Medium-Sized Enterprises (SME).
- The application has unlimited storage to store New Initial Public Offering(IPO) released in the year 2021 which constitutes the Sensex.

Role and Responsibility:

- Developed the User Interface and Backend for the Application
- Management of the Project

Technologies Used:

- Python | Tkinter
- SQLite
